

ROLE REFERENCE SHEET

Privacy Engineer

Privacy Engineer · Privacy By Design And Technical Controls

[Company] is hiring a Privacy Engineer to build privacy into products, services, data pipelines and AI systems. You will translate privacy requirements into technical requirements, architecture and controls, then help teams validate that those controls work across the data life cycle.

WHAT THE ROLE OWNS

- Translate privacy obligations and policy into technical requirements and acceptance criteria.
- Map personal-data flows, stores, interfaces, purposes, recipients and retention.
- Design or implement minimization, access, retention, deletion and audit controls.
- Build or improve consent, preference and individual-rights capabilities.
- Apply de-identification, pseudonymization or privacy-enhancing techniques where appropriate.
- Review product, analytics, vendor and AI designs for privacy risk.

FRAMEWORKS

- GDPR
- CCPA / CPRA
- ISO/IEC 27701
- NIST Privacy Framework

TYPICAL CERTS

- CIPT
- CDPSE

3–6 yrs

Engineering experience

Privacy by design

In the SDLC
